Summary

ESP32 CAM case / enclosure / (wall) mount using modular mounting system

[Hobby & Makers](#) > [Electronics](#)

Tags: [camera](#) [wallmount](#) [electronics](#) [esp32](#) [esp32cam](#) [ceilingmount](#) [securitycamera](#) [homeautomation](#) [espressif](#) [modularmountsystem](#) [modularmountingsystem](#)

Fits the AZDelivery ESP32 Cam Module Board. There's a good chance other branded boards also fit.

- Snap fit enclosure
- Enclosure has holes for the ESP32 cam board pins to hold it in place
- Use some glue or double sided tape to attach the modular mount plate

I remixed the enclosure from a generic ESP8226 box project. Will add a link to the project once I find it.

The modifications to fit the ESP32 CAM board + camera are made by me, as is the attachment for the modular mounting system.

I will be personally using this to create a security camera system over wifi. If you decide to use this model, please share a make. I'd love to see what you're using it for :)

Update 10-04-2023:

- Added adjustable ball joint ceiling / wall mount with dupont cable duct

Update 28-03-2023:

- Added V2 which includes a port in the back which can be used to power the ESP32 with 5v using dupont connectors
